

## **Blaize named into top 10 of Select 200 Companies at Forbes India DGEMS 2024**

November 19, 2024

*Forbes India honors top companies with global business potential at annual event in New Delhi, India*

**El Dorado Hills, CA, November 19, 2024** — Forbes India has recognized [Blaize](#), a provider of purpose-built, artificial intelligence (AI)-enabled edge computing solutions, as a Select 200 Company with Global Potential, at its annual D Globalist Entrepreneur Mobility Summit 2024 (DGEMS). Blaize was recognized as a top 10 company.

DGEMS recognizes the achievements of leading entrepreneurs and creates a platform for companies of global scale to share and interact. The Summit creates a global network for the newly-minted winners through sessions with global thought leaders and interactive activities.

At the 2024 DGEMS event on November 18, Blaize CEO and Co-founder Dinakar Munagala participated in an expert panel discussion alongside other leaders of companies that placed in the top 10 to discuss AI expansion across global markets. In addition to Munagala, the panel featured Vikram Handa, founder and managing director of Epsilon Carbon; Vikas Singh, managing director and CEO of MMTC-PAMP; and Shankar Prasad, founder and CEO of Plum.

“Amid the tremendous opportunity in the current global AI landscape, it’s an honor for Blaize to be selected as a top 10 company alongside such a distinguished list of companies,” said Munagala. “Big players today are focused on AI in the data center, leaving the edge less developed. Anywhere there’s a camera, there’s an opportunity for AI to act as the brain, performing real-time analytics. While the cloud is critical, the data generated at the edge is a million times larger. This creates a unique opportunity for AI solutions that prioritize privacy for practical AI in areas like agriculture, healthcare, education, defense, manufacturing and smart cities.”

This recognition underscores Blaize’s commitment to creating AI solutions for global problems, empowering businesses across industries to use AI-enabled edge computing for unmatched performance and scalability. As one of the prestigious top 10 companies selected for this honor, Blaize has captured some of the highest scores on global business potential.

### **About Blaize**

Blaize provides a full-stack programmable processor architecture suite and low-code/no-code software platform that enables AI processing solutions for high-performance computing at the network’s edge and in the data center. Blaize solutions deliver real-time insights and decision-making capabilities at low power consumption, high efficiency, minimal size, and low cost. Blaize has raised over \$330 million from strategic investors such as DENSO, Mercedes-Benz AG, Magna, and Samsung and financial investors such as Franklin Templeton, Temasek, GGV, Bess Ventures, BurTech LP LLC, Rizvi Traverse, and Ava Investors. Headquartered in El Dorado Hills (CA), Blaize has more than 200 employees worldwide with teams in San Jose (CA), Cary (NC), and subsidiaries in Hyderabad (India), Leeds and Kings Langley (UK), and Abu Dhabi (UAE).

### **About [D Globalist Entrepreneur Mobility Summit 2024](#) (Forbes India)**

DGEMS is a summit celebrating entrepreneurial excellence and creates a platform for companies with globally scalable offerings to connect and collaborate. The Summit aims to facilitate a borderless ecosystem for the newly-minted eXtrepreneurs through sessions with global thought leaders and interactive activities facilitating a global network.
