

Blaize and Datacomm Sign Technology Alliance MOU to Explore AI Inference Solutions Across Indonesia

April 21, 2026

Technology Alliance Targets Indonesia's Growing AI Inference Market, with an Initial Focus on Physical AI, Public Safety, Surveillance, and Industrial AI Applications

EL DORADO HILLS, Calif. and JAKARTA, Indonesia, April 21, 2026 /PRNewswire/ -- Blaize Holdings, Inc. (Nasdaq: BZAI, Nasdaq: BZAIW) ("Blaize," the "Company," "we," "our," or "us"), a global leader in programmable, energy efficient AI computing, and **PT Datacomm Diangraha ("Datacomm")**, one of Indonesia's leading IT service providers and cloud infrastructure specialists, today announced the signing of a Memorandum of Understanding (MOU) establishing a technology alliance to explore the potential of AI inference solutions across Indonesia.

The MOU was signed during a ceremony at **Gitex Asia 2026** in Singapore, marking a meaningful step in both companies' shared commitment to advancing practical AI capabilities across the Indonesian market.

Indonesia: A Strategic AI Market

Indonesia is one of the fastest-growing AI markets in Asia Pacific, with global hyperscalers, sovereign infrastructure programs, and enterprise technology providers all accelerating their presence in the country. According to the *Empowering Indonesia Report 2025* by Indosat Ooredoo Hutchison and research firm Twimbit, sovereign AI could contribute up to **USD \$140 billion to Indonesia's GDP by 2030**, driving annual economic growth of up to **6.8%**. Indonesia's AI sector is expanding at a 31% CAGR, the fastest rate in Southeast Asia ([Marketing-Interactive, 2026](#)). Blaize and Datacomm are positioning this technology alliance to serve that growing demand, with an initial focus on physical AI, public safety, surveillance, industrial AI, and logistics.

Areas of Exploration

Under the MOU, Blaize and Datacomm intend to explore the following areas of cooperation:

- **AI Inference as a Service on DCloud:** Exploring integration of Blaize's Hybrid AI platform with Datacomm's DCloud public cloud platform and datacenter infrastructure to enable scalable inference services for enterprise customers across Indonesia.
- **Physical AI, Public Safety, Surveillance, and Logistics:** Exploring AI inference use cases spanning physical security, video analytics, smart surveillance, and logistics optimization across Indonesia's enterprise and public sector.
- **Industrial AI:** Jointly exploring AI inference applications for industrial automation, including computer vision and sensor-driven intelligence for Indonesia's industrial sector.

"Asia Pacific is at an inflection point for AI inference, and Indonesia stands out as one of the region's most significant contributors to that growth," said **Dinakar Munagala, Co-Founder and Chief Executive Officer of Blaize**. "Datacomm brings exactly the trusted, deeply embedded infrastructure presence and enterprise relationships this market requires. Together, we are exploring how Blaize's programmable, energy-efficient AI platform can unlock real-world value across public safety, smart infrastructure, physical AI, and logistics throughout Indonesia. This alliance is a strong foundation, and we intend to build on it."

"At Datacomm, we have spent over three decades earning the trust of Indonesia's enterprises, government institutions, and critical infrastructure operators," said **Tan Wie Tjin, President Director and Founder of PT Datacomm Diangraha**. "Indonesia is on the cusp of a significant AI transformation, and the demand for intelligent, scalable, and secure inference solutions is accelerating across every sector we serve. This alliance with Blaize is a natural and exciting step in our journey toward the AI era. The combination of Datacomm's cloud and datacenter infrastructure with Blaize's world-class AI inference platform positions us uniquely to serve this demand. I look forward to exploring the possibilities this technology alliance will unlock for our customers and for Indonesia's digital future."

The MOU is non-binding and outlines a cooperative technology framework under which the parties may pursue specific projects through future definitive agreements. The alliance will prioritize enabling **secure, scalable, and energy-efficient AI inference** solutions that integrate seamlessly into existing cloud, datacenter, and physical environments across Indonesia.

About Blaize

Blaize delivers a programmable AI platform, purpose-built for AI inference workloads in real-world environments. Its Hybrid AI architecture combines the Blaize GSP (Graph Streaming Processor), an efficient AI processor, with GPU-based infrastructure, enabling AI inference workloads to run across edge, cloud, and data center. Blaize solutions support computer vision, multimodal AI, and sensor-driven applications across smart cities, industrial automation, telecommunications, retail, logistics, and defense. Blaize is headquartered in El Dorado Hills, California, with a global presence across North America, Europe, the Middle East, and Asia.
